Sample wiki page with R code and chart generated

```r
R Code:
require(gvis)
M <- gvisMotionChart(Fruits, "Fruit", "Year", options = list(width = 550,
                   height = 450))
print(M,"chart")
```

Simple syntax highlighted & preview

1. Text output

This code:

```r
(R()) 1:10 (R)
```

Produces:

```
[1] 1 2 3 4 5 6 7 8 9 10
```
Escaping Wiki syntax

```r
[[R(wikisyntax=>0)]cat("__hello__")]
```

```
__hello__
```

Parsing Wiki Syntax

```r
{{R(wikisyntax=>1)}cat("__hello__")}
```

```
hello
```

rCharts

`rCharts` is an R package to create, customize and publish interactive javascript visualizations from R using a familiar lattice style plotting interface. It has been created by Ramnath Vaidyanathan. See more here: [http://rcharts.io/](http://rcharts.io/)

Below you will find a series of examples of nice charts using `rcharts` and the corresponding javascript library used in each case.
