**rCharts**

**rCharts** is an R package to create, customize and publish interactive javascript visualizations from R using a familiar lattice style plotting interface. It has been created by Ramnath Vaidyanathan. See more here: [http://rcharts.io/](http://rcharts.io/)

Below you will find a series of examples of nice charts using **rcharts** [http://rcharts.io](http://rcharts.io) and the corresponding javascript library used in each case.
