Sample wiki page with R code and chart generated

```r
require(gvis)
M <- gvisMotionChart(Fruits, "Fruit", "Year", options = list(width = 550, height = 450))
print(M, "chart")
```

Simple syntax highlighted & preview

Note: Remember that this is only a preview, and has not yet been saved!

1. Text output

This code:

```r
(r) 1:10(r)
```

Produces:

```r
[1] 1 2 3 4 5 6 7 8 9 10
```
Escaping Wiki syntax

```{r, results='asis'}
cat("__hello__")
```

```
__hello__
```

**Parsing Wiki Syntax**

```{r, results='asis'}
cat("__hello__")
```

```
hello
```

**Simple Interface: list runs/datasets**

![List raw datasets](image.png)

<table>
<thead>
<tr>
<th>Summary</th>
<th>Description</th>
<th>From user</th>
<th>Dataset file</th>
<th>Minimum value for axis X</th>
<th>Maximum value for axis X</th>
<th>LastModif</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sample dataset</td>
<td>This dataset was created as part of the sample data for r.test.</td>
<td>admin</td>
<td></td>
<td>1</td>
<td>10</td>
<td>2013-08-30T17:37</td>
</tr>
<tr>
<td>We are working on this dataset</td>
<td>This will soon be changed</td>
<td>admin</td>
<td></td>
<td>21</td>
<td>30</td>
<td>2012-05-11T16:57</td>
</tr>
<tr>
<td>A really old dataset</td>
<td>This dataset is outdated</td>
<td>admin</td>
<td></td>
<td>100</td>
<td>110</td>
<td>2012-05-11T16:57</td>
</tr>
</tbody>
</table>
Simple interface: Results for one run/dataset

Results

Values for X:
min: 1
max: 10

Those are the results:

Results from 1*10: 10
No attachment to display in this raw dataset

Graph with xmin 1 & xmax 10 and y=x^2

Simple templates for custom output
Flexible databases in Trackers to hold run parameters

![Tracker fields table]

Optional pop up helpers to edit plugin calls based on GUI

1. Basic image

![R Code]

R Code

```r
if(require(Cairo)){
  install.packages("Cairo", repos="http://ftp.heanet.ie/mirrors/cran.r-project.org")
}
```

```r
x <- c(1:10)
y <- x^x
plot(x,y)
```
Nice word clouds from just a few lines of R code

```
G5 <- gvisGeoMap(CiudadPopular, locationvar="Ciudad", numvar="Popular",
options=list(region="ES", height=350,
dataMode="markers",
colors=[0xFF5747, 0xFFB581, 0x060000]))

# plot(G5)
print(G5, "chart")
```

Custom maps with GoogleVis

Spanish city popularity after UseR!2013 ;-)
Embedded plot.ly charts: Fun with the Lognormal distribution

Embedded plot.ly charts: Heatmaps
Mobile display mode when needed

bigger font size and buttons for human fingers in mobile devices

rCharts

rCharts is an R package to create, customize and publish interactive javascript visualizations from R using a familiar lattice style plotting interface. It has been created by Ramanth Vaidyanathan. See more here: http://rcharts.io/

Below you will find a series of examples of nice charts using rcharts http://rcharts.io and the corresponding javascript library used in each case.

rCharts Interactive figures: NYT 512 Paths to White House

Obama has 106 ways to win 4 ties Romney has 18 ways to win

83% of paths 3.1% of paths 14% of paths

rCharts: show data on hover & control vars. displayed

Toggle display of variables by clicking on them in legend
rCharts: Easy creation of georeferenced custom maps

```r
map3 <- leaflet$new()
map3$setView(c(51.505, -0.09), zoom = 13)
map3$marker(c(51.5, -0.09), bindPopup = "Hi, I am a popup")
map3$marker(c(51.495, -0.083), bindPopup = "Hi, I am another popup")
map3$print("chart3")
map3$save("map3.html")
```

rCharts: Interactive magnification of figure regions

```r
n2 <- nPlot(Sepal.Length ~ Sepal.Width, data = sepal, type = "scatterChart",
group = "Species")
n2$xAxis(axisLabel = "Sepal.Width") # add x axis label
n2$yAxis(axisLabel = "Sepal.Length")
n2$print("nvd3Scatter")

n2$lib2[href = "http://r.tiki.org/charts_libraries/nvd3"
n2$save("n2.html")
```

![](map.png)
rCharts: Select time range on X and vars on Y

move slider ends on X axis to filter on new time frame and toggle variables clicking on legend

Clickme: Interactive filtering charts by point names

Groups  Show one
- A (168)
- B (165)
- C (167)
Clickme: highlight data points with partial filter match

Animation in time-based charts
Ecoengine: distribution maps based on database records

Ecoengine: Photo viewer based on remote ecological data
