Escaping Wiki syntax

```r
[[R:wikisyntax-->0]]cat("__hello__")[[R]]
```

```
__hello__
```

Parsing Wiki Syntax

```r

rCharts

rCharts is an R package to create, customize and publish interactive javascript visualizations from R using a familiar lattice style plotting interface. It has been created by Ramanath Valiyathan. See more here: http://rcharts.io/

Below you will find a series of examples of nice charts using rcharts http://rcharts.io and the corresponding javascript library used in each case.
