RR (R syntax also)

Same as PluginR, but allowing the execution of potentially dangerous commands once the admin has validate

echo

Show a code block with the R commands to be run before running them (similarly to the echo command)

wikisyntax

Choose whether the output should be parsed as wiki syntax (Optional). Options: 0 (no parsing, default), 1 (parse)

LoadAndSave

Load a previous R user session (.RData, if any) for the same wiki page so that R object will be used while you

$rCharts$

$rCharts$ is an R package to create, customize and publish interactive javascript visualizations from R using a familiar lattice style plotting interface. It has been created by Ramanath Valiyathan. See more here: [http://rcharts.io/](http://rcharts.io/)

Below you will find a series of examples of nice charts using $rCharts$ and the corresponding javascript library used in each case.
